SUMMARY OF QUALIFICATION

- Extensive knowledge in Python Programming
- Good experience in Machine Learning and Deep Learning
- Experience in mobile application development
- Excellent written and verbal communication skills
- Worked collaboratively with others in a team environment on software development projects

EDUCATION

University of Windsor

Bachelor of Computer Science

Windsor, ON

Expected Graduation: April 2026

- Cumulative GPA: 3.5 / 4.0
- Admitted with advanced standing into the degree completion program.

Centennial College

Advanced Diploma in Software Engineering Technology – AI

Toronto, ON

Graduated April 2025

- Cumulative GPA: 4.311 / 4.5
- Graduated with High Honours - Recognized for outstanding academic achievement and consistent excellence.

EXPERIENCE

Peer Tutor

Centennial College

Toronto, ON

02/2025 – 04/2025

- Assisted fellow students with core courses including programming and machine learning.
- Clarified concepts and reviewed assignments to improve understanding and academic performance.
- Fostered a supportive and collaborative learning environment during one-on-one sessions.

SKILLS

Technical: Python, Java, C#, JavaScript, React.js, TensorFlow, SQL, Git, AWS

Soft: Communication, teamwork, problem solving, adaptability, leadership

Language: Vietnamese – Fluent, English - Proficient

VOLUNTEERING

Centennial College Orientation

Volunteer

Toronto, ON

04/2023 – 01/2025

- Provided direction and ushering students into the event.
- Approached students to answer questions.
- Managed event registration, distributed swag, and welcomed attendees.

PROJECTS

Immigration Consultation Chatbot

Team Lead

Toronto, ON

02/2025 – 04/2025

- Led a team of 6 in the end-to-end development of IRIS, a full-stack AI-powered chatbot supporting international students with real-time Canadian immigration guidance.
- Integrated Large Language Models (LLMs) and Retrieval-Augmented Generation (RAG) for accurate, conversational, and policy-grounded responses.

- Implemented a multi-agent system using LangGraph, applying agentic AI principles to orchestrate tasks such as document retrieval, question answering, and dialogue management autonomously — significantly minimizing the need for human intervention.

Student Attendance Tracking System

Toronto, ON

Team Member

03/2025 – 04/2025

- Developed a cloud-based automated attendance tracking system using AWS Rekognition and AWS Comprehend to detect student ID cards, extract textual data via OCR, and record attendance accurately.
- Implemented backend services using Python, AWS Chalice, and Boto3, with serverless architecture to process attendance data, store records in AWS S3, and provide real-time voice feedback using AWS Polly.
- Designed and built a user-friendly web interface with HTML, CSS, and JavaScript, enabling professors and administrators to manage attendance records, add student data, and generate reports securely.

Toronto Collision Prediction System

Toronto, ON

Team Member

02/2024 – 04/2025

- Analyzed real KSI (Killed or Seriously Injured) data from the Toronto Police Service, uncovering key factors contributing to collisions and enhancing the classification model.
- Developed an intuitive interface using HTML and CSS, allowing users to input data and receive personalized predictions on local collision risks.
- Integrated a Flask backend to process user inputs and generate real-time collision risk predictions based on trained models and neighborhood-specific data.
